Mr Gary Bell,  
Couplertec  
P.O.Box 8  
Tweed Heads, NSW 2485

Dear Gary,

I would like to thank you for the opportunity to trial your ***Couplertec Electronic Rust Protection System.***

It has been some two years now that this Company has had your product in use. During this time our two Nissan vehicles have clocked up 200,000 klms conducting Tag-a-long Tours to remote parts of Australia along with our Bush and Sand Driver Training closer to home. Our vehicles negotiate countless River Crossings and are constantly exposed to the elements in Coastal Regions; be it in Cape York, Cape Leveque, Middle Lagoon, Broome, at Tully Inlet or Karumba in the Gulf or closer to home, at Tewantin where monthly Sand Driver Training is conducted.

I have conducted my own tests on the ***Couplertec Unit*** by comparing two vehicles, one with a unit fitted and one without, over a seven day period and have clearly seen first hand how rapidly a salty environment can deteriorate a vehicle that has no such electronic aid.

In summary, I would like to advise that our vehicles operate at times under extreme conditions and harsh terrain. We have found very obvious results and would suggest that anyone seriously interested in significantly extending the life of their motor vehicle, should consider a ***Couplertec Electronic Rust Protection System.*** I have not hesitation in recommending this Unit.

Thank you again for the chance to trail your product.

Yours faithfully,

Bob Duncan
