The Manager
Couplertec Electronic Rust Protection

On behalf of Kiama Surf Lifesaving Club I would like to congratulate you on the excellent product you have made available to us.

For 5 years now we have had one of the Couplertec Systems on our 4 Wheel Drive Tow Vehicle for our Jet Rescue boat here in Kiama NSW with NO sign of corrosion or deterioration of the vehicles condition. The results speak for themselves.

With the harsh conditions this vehicle experiences being garaged by the wharf at Kiama Harbour and the constant exposure to the sea, our maintenance bills have been cut considerably by us having the Couplertec installed.

We need to be very aware of our costs as we are a voluntary organisation and depend upon the public for any needed funds. With this saving we can now channel more of our funds towards our rescue and surf club equipment.

Your product is to be commended for its simplicity and performance.
