### Couplertec Electronic Rust Proofing

Dear Gary,

I am writing to you today to thank you for your help and advice on rust protection for our surf club vehicles.

Just on five years ago you fitted our new Yamaha Rhino ATV with a Couplertec Electronic Rust Proofing device. We expected to have to replace the ATV after three years. To put that in money terms, by extending the life of the ATV by two years your device has saved us in excess of \$10,000.

For an organisation like ours that means the money goes directly to our core business, lifesaving and youth development instead of on vehicle maintenance, that's awesome!

Our vehicles operate in harsh coastal conditions and with many different drivers whom don't always look after the vehicle. The ATV specifically spends many hours out in the salty air on the beach and often is driven through the salt water.

Having had such success we are now in the process of having Couplertec devices fitted to our other club vehicles, a new Yamaha Rhino ATV, Toyota Commuter Bus and Hilux Ute.

It is with great pleasure that we recommend Couplertec Electronic Rust Protection to anyone interested in extending the life of their vehicles in any environment.

Kind Regards,

**Dermot McEnroe**  
General Manager
