Dear Garry & Michael

Re Toyota 4x4 Landcruiser Rust Protection

The South Coast Branch Surf Life Saving Queensland have this month traded this 2000 model 4x4 utility.
The vehicle was fitted from new with a Couplertec electronic rust inhibitor.

The Association would like to thank you for the introduction to this device to our vehicle.

The absence from any sign of rust was evident at the time of change over. The purchasing dealer was amazed at the condition of the paint work and under chasses, in fact the total absence of any rust to the vehicle. This vehicle has been at work on our Gold Coast Beaches every weekend during the past 3 surf seasons.

This electronic device has been refitted to our Nissan patrol 4x4 diesel utility for another 3 years.
Confident in the fact that this vehicle will be in the same rust free condition in 2006.

Once again that you and your company for the introduction to Coupler Tec.

Cheers

Barrie Crichton
President South Coast Branch Life Saving
