

Dear Allan,

I am pleased to provide you with the following testament about your product.

Working in the fertiliser industry for the last 10 years I have not come across a product that helps with the severe corrosion that comes with fertiliser and the humid northern tropics.

I was introduced to Couplertec by our current Forklift provider, they put four lease units into our Townsville site and to my initial surprise no Denso tape on any hydraulic fittings. Under normal circumstances (no Couplertec) these fittings would begin to rust overnight and would eventually fail in coming months; the four units were on our site for approximately 12+ months, below is a photo of one of the hydraulic fittings before leaving our site

Needless to say, without hesitation I now have four new forklifts and one scrubber sweeper all with Couplertec units fitted.

Regards,
